DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. **Claims 1-7, and 11-12** are drawn to structure of a rotor assembly used in an electric motor, classified in class 310, subclass 261.
 - II. **Claim 13** is drawn to method of making a rotor used in an electric motor, classified in class 29, subclass 596.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions in groups I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case there are various methods to fabricate an electrical motor's rotor including automatical machinery process and manual process, each of the processes including various processing steps.
3. A telephone call was made to Mr. Jay Moldovanyi, Reg 29678, on 12/21/01 to request an oral election to the above restriction requirement, but Mr. Moldovanyi could not be reached; therefore, did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2834

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
